### Biographical Sketch

Drew E. Winters, PhD. holds an Assistant Professor appointment at the University of Colorado Anschutz Medical Campus, Department of Psychiatry. His research aims to improve mental health treatment for those elevated in antisocial phenotypes, including callous-unemotional traits, conduct problems, and psychopathy. He leverages behavioral experiments, functional magnetic resonance imaging, as well as advanced statistical models to examine how brain function changes over the lifespan and its implication in the interaction between social cognition, affect, and executive function. By seeking to identify replicable neural mechanisms that support or disrupt these processes, Dr. Winters aims to inform effective interventions for antisocial phenotypes.
